This is in response to the Election filed on 14 February 2003.

I. Since applicants elect the invention of Group I, aqueous developer solution claims 1-16 without traverse, the application has been transferred to and the elected claims will be examined by examiner Hoa Van Le, Art Unit 1752.

II. The independent claim 1 is considered as the main invention. The dependent claims 2-16 are considered as the secondary embodiments.

III. There are three types of aqueous developing solutions in the claims, (1) aqueous black-and-white developing solution, (2) aqueous color developing solution and (3) aqueous activator solution. Each of types of the aqueous developing solutions has each own major search subclass. Therefore, an election of species among them is made for an initiation of a consideration and search as followed:

Claims 1-16 are generic to a plurality of disclosed patentably distinct species comprising (1) aqueous black-and-white developing solution, (2) aqueous color developing solution and (3) aqueous activator developing solution. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

Art Unit: 1752

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

IV. (1) With the language "surfactant or thickener", there is required to search for one of them only. No patentably different or distinct between is considered. The second compound in claim 2 is considered as optional or obvious to one having ordinary skill in the art for using them either one alone or their combination. (2) Each of types of the additives has each own major search subclass. Therefore, an election of species between them is made for an initiation of a consideration and search as followed:

Claims 1-16 are generic to a plurality of disclosed patentably distinct species comprising (1) surfactant additive and (2) thickening additive. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

V. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1752

VI. A telephone call was made to Mr. Geoffrey L. Oberhaus on 25 March 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Mr. Oberhaus requested a written Office action.

VII. No other issue is considered until a proper election is made and resolved.

VIII. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoa V. Le whose telephone number is 703-308-2295. The examiner can normally be reached on 6:30AM-5:00PM, M-TH.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Janet Baxter can be reached on 703-308-2303.
